HANIN FATHIMA

13/4 Gopal Residency, New Bel Road, Bengaluru-560094
Phone: +91 7892754329 | Email: haninfathima13@gmail.com

OBJECTIVE

Final-year B.E. student in AI and Data Science seeking an entry-level role spanning software development, data analytics, or applied machine learning. Experienced across the full stack from building production ML pipelines and full-stack web applications to leading small development teams with a strong foundation in Python, data engineering, and modern web frameworks. Eager to contribute to impactful, real-world systems.

EDUCATION

Bachelor of Engineering in AI and Data Science **Oct 2023 – Present**
M S Ramaiah Institute of Technology, Bengaluru | CGPA: 9.25

Higher Secondary Education (Class 12 – PCMB) **Jun 2021 – Feb 2023**
Little Rock Indian School | 92.4%

Secondary School Education (Class 10) **May 2023**
Little Rock Indian School | 93.2%

EXPERIENCE

Full Stack Developer & UI/UX Developer Intern **Apr 2026 – Jun 2026**
Root Developers UG (haftungsbeschränkt) | Remote Internship

PROJECTS

Elderly Safety Monitoring System | Edge AI & ML **2025**

- Built a real-time fall detection system using YOLOv8-Pose and MediaPipe on a Raspberry Pi 4 edge device.
- Designed an end-to-end ML pipeline: RTSP camera streaming, pose estimation inference, and automated SMS/email alerts.
- **Tech:** Python, YOLOv8, MediaPipe, OpenCV | Role: ML Engineer & System Designer

University Rankings Analysis | Data Analytics **2025**

- Analyzed the QS World University Rankings dataset to identify the top 3 metrics most influencing global rankings.
- Performed EDA, feature correlation, and trend analysis using Python (pandas, matplotlib, seaborn).
- Delivered visualizations and a structured report enabling focused decision-making on high-impact metrics.
- **Tech:** Python, pandas, matplotlib, seaborn | Role: Data Analyst

Social Network Analysis using Graph Theory | ML & Analytics **2024**

- Modeled large-scale social networks as graphs; applied centrality and pathfinding algorithms to discover key influencers.
- Built and evaluated graph-based models to surface hidden relationships and improve network insight quality.
- **Tech:** Python, NetworkX | Role: Lead Research & Implementation

Hospital Resource Allocation | Algorithm Design (DAA) **2025**

- Designed an optimized resource allocation algorithm using DAA principles to address peak-demand inefficiencies.
- Reduced simulated patient wait times and improved resource utilization through data-driven scheduling logic.
- **Tech:** Java | Role: Algorithm Designer & Coder

SKILLS

Programming Languages: Python, Java, JavaScript, C, SQL
Web & Frontend: React.js, HTML5, CSS3, Node.js
Mobile Development: Flutter, FlutterFlow
Libraries & Frameworks: NumPy, pandas, scikit-learn, matplotlib, seaborn, OpenCV, YOLOv8
Databases: SQL, MongoDB
